

Interior door systems

Drive units, door leaves and door operating controls

With our own product development and a comparatively high level of vertical integration in-house, we are the perfect partner to provide you with tailored system solutions. You can of course also order from our range of replacement parts.

- Customisation and new development also for small batch production
- Customer service throughout the project and aftersales services
- Fire protection

Drive systems

- Roller guides with ball-bearing plastic rollers
 - Straight, curved or telescopic rail versions
 - Electrical, pneumatic or manual drives (own hardware and software)
 - Compact extruded sections for minimal space requirements for installation
-

Door leaves

- Straight door leaves with aluminium frames and enclosed toughened glass pane
- With optional ventilation grille, blank section or complete glass surface
- Curved door leaves in sandwich design with high pressure laminate coating

Door operating controls

- Pushbutton operation, handle, sensor control, or manual operation
- Square-key lock for connecting doors and compartment doors
- WC lock with automatic locking in the event of a fault and emergency unlocking
